

Ceanothus 'Tuxedo' ppaf

- Origin: Ireland
- Species: Hybrid potentially (thyrsiflorus x dellianus)
- Bloom Period: Fall
- Dimensions: 8' x 8'
- Zone: 8
- Exposure: Full Sun
- Soil: Well Drained
- Water: Drought tolerant when established, avoid overwatering
- Production Timing: 72 liner – 1gallon 8-10 mos.
- Liners Size: 72 deep
- Available: Fall 2008

Ceanothus
Tuxedo

Ceanothus Tuxedo is an exciting new introduction of the native California Lilac. This selection is notable for its very dark foliage, a true breakthrough in Ceanothus breeding. Tuxedo is an upright selection with a open well branched habit. It responds well to pruning and will make a dramatic garden specimen. Tuxedo will grow to approximately 8' tall by 8' wide. This variety was selected in Ireland and should be hardy to Zone 8. Tuxedo is a fall blooming variety with lavender blue flowers. Plants will bloom sporadically through warmer months but reach their full flowering potential in late summer to fall.
